

# VK-ÉK-1 Wedge tool

## Instructions

Manufacturer's name: VILLBEK Kft.

Address: 15. Vágány Street, Szeged, Hungary, 6728

Read the instructions below before using the product. Keep it for later use. The manufacturer (VILLBEK Kft.) cannot be held accountable for damages resulting from non-observance of the safety instructions, improper use or storage of the product.

### **General information**

Product name: Wedge tool

Type: VK-ÉK-1

Material: HDPE

Weight: 2x60 grams + Ø 3 mm polyester rope

Area of application: During the installation of connectors, the phase conductors of an insulated twisted overhead cable can be separated by using this wedge. The wedge can also be used when installing suspension clamps.

### **Intended use**

The product must be used or stored in the following temperature range due to its material nature: [(-10 ° C) - (+ 40 ° C); tolerance: ± 2 ° C]

- Do not expose the product to direct sunlight or store it in the immediate vicinity of a window.
- Do not expose the product to direct strong frost or ground frost.
- Do not use or store the product in the immediate vicinity of a heat source!
- Use and store only in a dry place!

The product may not function properly or may become deformed if operated or stored at temperatures outside the specified range for extended periods of time.

### **Safety instructions**

Under normal circumstances, polyethylene is not considered to be a hazardous substance in contact with the skin.

If you notice any changes in the tool, please do not use it again!
